**Subject:** GWI Conference Bulletin June 2014

**Welcome to the July edition of the conference bulletin presented by Global Water Intelligence. Please go to our [events page](#) to see a full list of 2014's events.**

### **Water UK Innovation Hub**

*9 July 2014; London, UK*

Water UK's Innovation Hub offers a unique opportunity for companies and stakeholders to share insights on how they are developing their all-important relationship with their customers.

With discursive roundtable hubs, this dynamic and interactive event brings together senior industry representatives and key stakeholders to explore current challenges and share ideas. The day will see a number of engaging sessions, each led by water company senior executives, surrounding customer culture, debt and affordability, and designing the customer experience. Panels will explore lessons learnt from other sectors and regions, whilst a partnership showcase will demonstrate how effective partnerships can make a real difference in helping struggling households.

### **The International Congress on Water, Waste and Energy Management**

*16-18 July; Porto, Portugal*

The International Congress on Water, Waste and Energy Management ([www.ewwm.net](http://www.ewwm.net)) is organized by teachers and researchers of the C3i/IPP (Portalegre, Portugal), the Extremadura University (Spain) and the Salamanca University (Spain). This event has the objective to join academics, researchers and scientists from several universities in an international forum to discuss matters related to the indicated areas and also to present results of researches held in these subjects. This congress will be held in Oporto (Portugal) from 16-18 July 2014.

### **The 10th China (Beijing) International Water Treatment,Pump,Valve and Pipe Equipment Exhibition**

*24-26 July; Beijing, China*

It is the fourth year of the 12th Five-Year Plan in 2014 and with the vigorous promotion of national policy, the water treatment industry has become one of the fastest developing sectors in China. As a bellwether of water treatment industry, China Water Expo has always been regarded as an unmissable industry event.

This exhibition has established some specific areas including; sewage treatment area, membrane technology area, pump/pipe/valve area, water terminal pavilion, instruments and meters area and medicament pavilion. The exhibition will cover the water and sewerage industry and the latest production of international water treatment. Attention will be paid to sophisticated techniques and solutions. Water professionals can expect to learn more about these industries, enhance communication and promote technical exchanges in order to achieve mutual benefit.

### **3rd Annual Water Management in Mining Summit**

*29 - 30 July; Denver, USA*

The summit will investigate the regulatory atmosphere, technical methods for dealing with challenges such as Tailings & Acid Mine Drainage – and also explore the role that varying departments have in the water management process in order to ensure that your mine has a comprehensive and holistic approach to water management. Join Rio Tinto, U.S. Energy Corp, DeBeers, St. Cloud Mining, Kinross, Imperial Oil, Total, Newmont, Thompson Creek Metals, Consol Energy and more who are attending the summit this July.

### **ISA Water/Waste Water and Automatic Controls Symposium**

*5-7 August; Orlando, USA*

The 2014 ISA WWAC Symposium is a three-day event that focuses on the challenges associated with providing reliable, secure and cost-efficient automation for the world's municipal water/wastewater infrastructure. The gathering features two full days of technical speakers/presentations, networking events, a poster session, and a supplier showcase. This year's program also includes an optional tour of a local wastewater treatment facility, and two optional short courses on SCADA Cyber Security and Troubleshooting Instrumentation and Control Systems.

### **3rd LatAm Mine Water Conference**

*27 - 28 August; Lima, Peru*

Increasing concerns at about water supply and quality in Latin American countries have led mining firms to look at innovative strategies to manage their water footprints and adopt best water management practices. After two highly praised editions in Brazil and Chile, the LatAm Mine Water Conference moves to Lima, once again bringing to the forefront best practices, new technologies and effective cost reduction strategies.

### **GCC Power and Water Forum**

*1 - 2 September; Dubai, UAE*

The GCC Power and Water Forum is a unique global platform for promoting power and water sustainability in GCC region. This forum will witness top level dignitaries and experts of the power and water industry from the entire GCC region.

Topics of discussion are different control policies, quality management, analysis of the most suitable technologies, effective management of power & water resources. These topics will be addressed by Vahid Fotuhi, MESIA; Abdullah Alhagbani, NWC; Alice Cowman, CEBC.

BE Summits ensures a quality knowledge sharing forum along with an appropriate essence of business opportunities to benefit the organizations today.

#### **Water Loss Asia 2014**

*3 - 4 September; Kuala Lumpur, Malaysia*

The 4th Water Loss Asia Conference and Exhibition is the first regional Southeast Asia event of the IWA WLSG. Themed “Intelligent NRW Management for Smart Cities”, the event will bring together the water industry experts to share and showcase their latest innovations or solutions, knitting together the many pieces of the puzzle in NRW management and solving the challenges of linking utility systems together for “real-time leak management”. Water Trenchless Technology Asia 2014 is held concurrently, encouraging the use of trenchless technology in an urbanized setting with high pedestrian and vehicle traffic. The event will also feature a pre-conference workshop on “The Four Pillars of Managing Commercial Losses” as it is a critical part of any NRW management program with an additional benefit of improving revenues for water utilities.

#### **UWT 2014 China**

*3 - 5 September; Shanghai, China*

Hosted by National Engineering Research Center (South) of Urban Water Resources and authorities in water industry, UWT China 2014 would be grandly held in SNIEC (Shanghai New International Trade Fair Center) on Sept.3-5, 2014. UWT China 2014 will attract professionals and water engineers from whole the world. UWT China will focus on Water and Sustainable Development, and show the latest products and technology which such as water supply system, water drainage system, Solar-building integration System, solar-building integration system, wastewater treatment system, municipal pipe system and so on. Water treatment industry has a developing market in China nowadays. Thus, UWT China 2014 will provide you a greatest opportunity for expanding China market and purchase advanced products.

#### **Wastewater Treatment and Recycling**

*7 - 8 September; Abu Dhabi, UAE*

Learn the ways of achieving a cost effective and sustainable wastewater treatment process in this 2-day “Wastewater Treatment & Recycling” training. It will offer you a chance to be a

step ahead, equipping you with pragmatic techniques in achieving the best way of treating wastewater. We are launching the training with a keynote presentation by the regulations and supervision bureau to develop your understanding of the current compliance standards and requirements. It is going to be a waste if you miss out on this!

#### **29th Annual WaterReuse Symposium**

*7 - 10 September; Dallas, USA*

The 29th Annual WaterReuse Symposium is the best place to learn about the latest innovations in water reuse and desalination. Scheduled for September 7-10, 2014 in Dallas, Texas, this event will feature more than 100 technical presentations, roundtable and panel discussions, technical tours, a welcome reception, a networking dinner, and a popular exhibit hall. The issues and topics to be addressed include direct potable reuse, desalination, industrial reuse, water quality, and much more. Highlights of the Symposium include the keynote presentation, Smarter Planet 2.0, from Dr. Sean McKenna of the IBM Research Smarter Cities Technology Centre, and a General Manager's Roundtable featuring insights from the leaders of prominent water utilities.

#### **TEXAS DESAL 2014 | Best Practices & Emerging Technology**

*11 - 12 September; Austin, USA*

The Texas Desalination Association's conference brings together a diverse array of topics, presenters and attendees to build understanding and opportunities for desalination in Texas. Attendees are assured lively and informative discussions among industry experts, policymakers, regulators, researchers, and water planners on the leading edge of new water supplies. Confirmed special guests include TCEQ Director Bech Bruun and State Representatives Todd Hunter and Lyle Larson who will address desalination from policy and legislative perspectives. For sponsorship and exhibitor opportunities, contact [kford@waterpr.com](mailto:kford@waterpr.com). Full conference details at [TexasDesal.org](http://TexasDesal.org). Earlybird registration ends July 15.

#### **Produced Water Management - 11th Global Praxis Interactive Technology Workshop**

*15 - 17 September; Tunis, Tunisia*

The 2014 Produced Water Management: 11th Global Praxis Interactive Technology Workshop aims to bring together senior industry experts in the domain of produced water in order to address critical challenges and provide a highly interactive platform for brainstorming and knowledge sharing through a series of master classes, case study presentations and interactive breakout discussions. The workshop will provide an ideal platform for decision makers within E&P operating companies and technology solution providers to arrive at practical solutions to current field conditions.

#### **The Water Event 2014**

*16-17 September; Birmingham, UK*

Discover how a visit to The Water Event 2014 can help you to understand how you can best manage and procure water- creating a sustainable water strategy and hedging future business risk. The show starts on 16th September 2014 and you can register for the show for free anytime from now until the event itself. Visit us regularly and we keep you updated with news about exhibitors and the event itself throughout 2014.

The Water Event is the only UK-based event which directly addresses the business imperative of future proofing, water management and efficiency to reduce cost and impact a client's bottom line.

### **The Water Expo**

*16 - 17 September; Miami, USA*

The Water Expo (September 16 & 17, 2014, in Miami, Florida) is the only event in the United States providing access to the ever-growing, non-stoppable WATER related markets in ALL The Americas. It combines a major trade show with front edge educational and networking programs, showcasing cutting-edge technologies, services, know-how & education. The Water Expo is supported by prestigious industry sponsors, partners and hemispheric institutions and takes place in Miami, America's Business Hub. Visit [www.TheWaterExpo.com](http://www.TheWaterExpo.com)

Register NOW Online and by Registration Form at pre-show rates (75%off until July 1st; 50% until Aug 1st; 25% off until Sept 1st). To exhibit download the packet. For assistance [mail@TheWaterExpo.com](mailto:mail@TheWaterExpo.com) (305) 412-3976

### **3rd Annual Water in Mining Summit**

*16 - 18 September; Perth, Australia*

The 3rd Annual Water in Mining Summit will bring together water and environmental experts as well as government regulators and industry consultants to discuss new technologies, innovative solutions and successful strategies for managing water at mine sites.

The case study-led program will highlight new techniques and best practices for dewatering, water treatment, sustainable re-use of water, mine pit lake and tailings management, and the latest modelling tools and assessment frameworks to monitor the water quality and quantity at your projects.

Visit our website [www.water-in-mining.com](http://www.water-in-mining.com) to download the brochure, view the agenda, and see our speaker line-up. To register, contact Resourceful Events at +61 2 8525 9488 or [info@resourcefulevents.com](mailto:info@resourcefulevents.com)

### **SibAqua-2014 International Forum**

*16 - 18 September; Novosibirsk, Russia*

The relevance of this project is beyond doubt. The issues of quality water purification and

treatment, adaptation of modern systems at the enterprises and the housing sector are urgent.

The main objectives:

- Demonstration of advanced technologies for water supply, treatment and disposal;
- Discussion of relevant issues of domestic and industrial waste treatment;
- Formation of business and economic relations between the participants of the market from Russia and other countries, experience exchange.

The main industry partner is MUE Gorvodokanal (Novosibirsk).

The central event of the Forum is 10th training conference “Addressing ecological security in the water sector”.

### **The IWA World Water Congress & Exhibition 2014**

*21-26 September; Lisbon, Portugal*

The IWA World Water Congress & Exhibition 2014 is the biannual high-profile international event organised by the International Water Association (IWA). 2014's congress will be held in Lisbon, Portugal, 21–26 September.

The international audience of over 5,000 will be exposed to your products and services for four days, from Monday to Thursday 22–25 September. The exhibition attracts people involved with water utilities, technology, and product manufacture, consultancies, knowledge and research institutes, government and non-government organisations and the media. It also draws non-congress delegates who have a keen interest in the trade exhibition. The event is considered the prime meeting point for those in the water world and it is where water companies, consultants and technical suppliers unveil and present their leading-edge innovations in water. Delegates understand that this high-profile, international congress is a must for anyone who wants to keep up with the latest in water research, management and policy.

Can your organisation afford to miss the exposure and opportunities of an audience of 5,000+ water leaders?

### **Envirotech Asia 2014**

*22 - 24 September; Gandhinagar, India*

Radeecal Communications (Ahmedabad, India) has planned to organize “Envirotech Asia 2014”- an Exhibition and Conference during September 22-23-24, 2014 at Mahatma Mandir, Gandhinagar, Gujarat, India. Ministry of Forest and environment and Gujarat Pollution control Board are the organizing Partner of Envirotech Asia 2014. National and international companies which caters the entire segment in Waste Water Treatment, Solid Waste Management, Recycling, e-Waste, Renewable energy sector and pollution control solutions will be the attraction of the event.

Why India?

The environmental Technologies market in India is emerging and estimated at approximately USD 9 Billion per year with an annual growth rate of 15 %.

Why Gujarat?

Gujarat has robust infrastructure and fast track economic development amongst all other states in India. The State has prepared a long term vision in the form of Blueprint for Infrastructure in Gujarat – 2020 (BIG 2020). The department envisages an investment of around Rs. 12 lakhs crore by 2020 across various infrastructure sectors.

### **Infrastructure Asset Management 2014**

*23 September; London, UK*

A conference tackling cross-sector asset management issues in a year of change as the regulatory outcomes agenda becomes reality, recent extreme weather raises important questions about resilience, and the industry sees the introduction of new international standards. The 2014 conference explores how current issues stand to affect asset management and seeks to determine best practice in a dynamic environment. With speakers from energy, water, rail, roads and airports, IAM 2014 brings together asset management leaders from a wide range of industries to debate everything from regulation to risk, alliance building to technology.

### **Water Industry Energy and Carbon Management Conference**

*23 September; Birmingham, UK*

The Energy and Carbon Management Conference, taking place on day one of Sustainable Water 2014, examines the challenges of reducing energy usage and carbon emissions and increasing renewable energy investment.

Attend this CPD-certified conference to:

- Find out how Anglian Water is investing in efficiency infrastructure to deliver cost-effective and sustainable projects
- Explore whether Wessex Water's 80% GHG reduction by 2050 is a SMART target or deluded optimism
- Gain first-hand insight into Scottish Water's energy strategy and self-sufficient treatment works

Expert speakers include:

- Ronan Palmer, Environment Director, Ofwat
- Chris Newsome, Director of Asset Management, Anglian Water
- Graham Southall, Head of Commercial Projects, Thames Water

For more information please visit: [www.sustainable-water.co.uk](http://www.sustainable-water.co.uk)

### **Environmental Water Management Conference**

*24 September; Birmingham, UK*

The Environmental Water Management Conference, taking place on day two of Sustainable Water 2014, examines the challenges of balancing economics and the environment.

Attend to:

- Understand how Severn Trent Water is approaching the sustainable implementation of the Water Framework Directive.
- Find out how South West Water is building a better water future through 21st century catchment management
- Apply lessons learnt from New York City Department of Environmental Protection's approach to sustainable infrastructure.

Expert speakers include:

- Lord Chris Smith, Chairman, Environment Agency
- Carter Strickland, Former Commissioner, New York City Dept. of Environmental Protection
- Tony Harrington, Director of Environment, Dŏ...Âµr Cymru Welsh Water

For more information please visit: [www.wwt-environment.net/home](http://www.wwt-environment.net/home)

#### **WEFTEC 2014**

*September 27 - October 1; New Orleans, USA*

The greatest minds in water meet at WEFTEC®, the premier water quality event of choice for thousands of professionals looking for innovative water quality solutions. Offering the highest value by being priced lower than any other water quality conference of its kind, WEFTEC provides the highest-quality, most comprehensive educational content and the largest annual water quality exhibition on the world. With nearly 1,000 exhibiting companies, 145 technical sessions, 31 workshops, 11 mobile sessions, and 8 facility tours, join us at WEFTEC 2014, September 27 – October 1, in New Orleans, and Make THE Water Quality Event YOUR Water Quality Event!

#### **The 2nd European Shale Gas and Oil Summit 2014**

*29 - 30 September; London, UK*

The 2nd European Shale Gas and Oil Summit 2014 takes place in London on September 29th – 30th and includes:

- Two-day Conference
- Roundtables
- Exhibition
- Networking

The event will bring together government officials, academics, and energy experts alongside shale gas operators, contractors and service companies.

The conference will provide a forum for the shale gas community to discuss the latest developments and strategies within shale gas exploration across Europe. Themes the event will be covering include:

- Policy and Strategy
- Geology Testing and Exploration
- Operations and Hydraulic Fracturing
- Environmental Framework and Regulation
- Water Management
- Community Engagement

The exhibition will play host to companies looking to promote their products and services towards the shale gas market.

### **8th European Waste Water Management Conference**

*7 - 8 October; Manchester, UK*

Penetrating the latest practical experience and research into wastewater over two days with great opportunities to engage with the experts. The European Waste Water Management Conference (EWWM) is one of the few events in the UK that deals specifically with problems and solutions for the management and treatment of wastewater and attracts the most authoritative global experts in the area.

With participants from across Europe; the programme for this year's event will include over 50 technical papers, including novel supplier solutions to future treatment challenges. A range of topics including Removal of Phosphorus & Priority Substances and Energy Efficiency & Recovery are covered. For full details visit [www.ewwmconference.com](http://www.ewwmconference.com)

### **Aqua Taiwan 2014**

*08 - 10 October; Kaohsiung, Taiwan*

AQUA TAIWAN 2014 is an ideal platform for water professionals from home and abroad to showcase their latest tech, services and products. The event is expected to attract 150 exhibitors and more than 5,000 international visitors. Unlike other water-linked events, AQUA TAIWAN is showcasing water treatment solutions of household/commercial/industrial applications.

Pre-registered visitors may obtain the complimentary official show directory upon arrival at the showground ([www.aquataiwan.net](http://www.aquataiwan.net)). For details and applications for incentives, qualified visitors may contact their nearest TAITRA office (<http://branch.taiwantrade.com.tw>).

### **Stormwater Management Summit**

*19-22 October; Abu Dhabi, UAE*

Stormwater management has become crucial in the Middle East region due to rapid growing

cities, lack of adequate stormwater drainage networks and the witnessed increase in rain fall in the past few years. This in return has promoted governments to increase the scope of activities and funding for this important area of concern in order to enhance the quality of life for all its citizens.

As such, IQPC is launching Stormwater Management Summit taking place from 19-22 October 2014 at The Westin Abu Dhabi Golf Resort and Spa. This event will provide an interactive platform for local governments, municipalities and industry leaders to address the urgent challenges relating to planning, construction and maintenance of stormwater drainage networks in the Middle East region.

### **WaterIDEAS 2014**

*22 - 24 October; Bologna, Italy*

WaterIDEAS 2014 is held in cooperation and conjunction with ACCADUEO [www.accadueo.com](http://www.accadueo.com), the international exhibition of technologies for treatment and distribution of drinking water and wastewater treatment and follows a series of successful conferences of IWA, including the WaterLossEurope Conference hold in Ferrara in May 2012. Water IDEAS 2014 is intended to present and discuss the latest developments, strategies, techniques and applications of international best practices in Innovative Water Networks Management.

### **American Water Summit: Smashing Silos**

*23-24 October; Houston, Texas, USA*

The American Water Summit, now in its 5th year, is the only event in the water calendar that focuses entirely on the business of water in North America. The Summit brings together 400 top executives and thought leaders from the public and private sectors in a format that is geared toward maximum networking return as well as the discussion of cutting-edge ideas.

The Summit will be attended by a wide range of industry stakeholders, including public and private utilities, consulting engineers, contractors, water technology and service companies, industrial water users, banks, investment funds, oil & gas and power generation companies and state and federal government agencies. 2014 Summit will have a strong energy focus in keeping with the times and reflecting the fact that the host city is the Energy Capital of the world.
